Lemuel Bryant

Aspiring Data Scientist | Python Developer | Data Analyst

Houston, Texas
Email: lem379-datascience@yahoo.com
GitHub: https://github.com/LEMUELBRYANT
Portfolio: https://lemuelbryant.github.io/data-science-portfolio/

Professional Summary

Aspiring data scientist with a strong foundation in Python, data analysis, and machine learning, complemented by extensive professional experience in analytical chemistry and laboratory operations. Experienced in collecting, analyzing, and interpreting complex scientific data while maintaining high standards of quality and documentation. Currently building a portfolio of end-to-end data science projects demonstrating data cleaning, exploratory data analysis, machine learning, and effective communication of technical results.

Technical Skills

Programming Languages

- Python
- SQL (foundational)
- HTML
- CSS

Data Science & Machine Learning

- Pandas
- NumPy
- Matplotlib
- Seaborn
- Scikit-learn
- Data Cleaning
- Exploratory Data Analysis (EDA)
- Feature Engineering

- Classification Models
- Model Evaluation
- Random Forest

Tools & Technologies

- Jupyter Notebook
- Git
- GitHub
- Visual Studio Code
- Bootstrap

Featured Project

Water Potability Prediction Using Machine Learning

Developed an end-to-end machine learning workflow using the Kaggle Water Quality and Potability dataset.

Project Highlights

- Cleaned and prepared a real-world dataset using median imputation.
- Performed exploratory data analysis using histograms, boxplots, correlation heatmaps, and pairplots.
- Built and evaluated a Random Forest classification model using Scikit-learn.
- Assessed model performance using accuracy, precision, recall, F1-score, and a confusion matrix.
- Documented the complete workflow in Jupyter notebooks and published the project as a portfolio case study.

Technologies Used

Python • Pandas • NumPy • Matplotlib • Seaborn • Scikit-learn • Git • GitHub

---

Professional Experience

Senior Chemist

Halliburton — **Houston, TX**

- Conducted laboratory experiments supporting corrosion research and product development.
- Collected, analyzed, and documented experimental data to support technical decision-making.
- Collaborated with scientists and engineers to evaluate laboratory results and improve testing procedures.
- Maintained quality, safety, and documentation standards in a research environment.

Laboratory Technician (Contract)

Infotree Global (BASF) — Freeport, TX

- Monitored chemical processes and performed quality assurance testing of hydroxylamine sulfate, nitric acid, and ammonia.
- Operated analytical instruments including autotitrators, TOC analyzers, UV-VIS spectrometers, FTIR, and gas chromatography (GC).
- Recorded and interpreted analytical data to verify product quality and process performance.

Chemist IV

Clean Harbors — Deer Park, TX

- Performed environmental analyses for polychlorinated biphenyls (PCBs), volatile organic compounds, and semi-volatile organic compounds using EPA analytical methods.
- Operated and calibrated GC and GC/MS instrumentation.
- Collected, analyzed, documented, and reported laboratory data while maintaining quality assurance standards.

Process Development Technician III

Schlumberger — Sugar Land, TX

- Conducted laboratory studies evaluating stimulation fluids used in oil and gas well operations.
- Performed conductivity and rheology testing under varying temperature and pressure conditions.
- Analyzed experimental results, created data visualizations, presented findings, and communicated technical conclusions to project teams.

Additional Laboratory Experience

Professional experience in pharmaceutical, biotechnology, environmental, and industrial laboratories performing analytical testing, quality control, scientific documentation, laboratory data analysis, and process improvement.

Education

Bachelor of Science in Chemistry

Virginia State University
Petersburg, Virginia

Certifications

- Google Data Analytics Professional Certificate (Coursera)
- Python for Everybody Specialization (University of Michigan / Coursera)
- PCEP – Certified Entry-Level Python Programmer (OpenEDG Python Institute)

Professional Strengths

- Analytical problem solving
- Data-driven decision making
- Scientific methodology
- Statistical thinking
- Technical documentation
- Attention to detail
- Continuous learning

Career Objective

To contribute as a Data Analyst or Junior Data Scientist by applying analytical thinking, Python programming, and machine learning techniques to solve real-world business problems while continuing to expand my expertise through increasingly challenging data science projects.
